# CPRMOON

COMMUNITY ROADMAP | DIAMOND HANDS REWARDS

A transparent, milestone-driven plan for building the CPRMoon community and recognizing long-term token holders.

| PUBLIC RELEASE | PROGRAM STATUS | REWARD FUNDING |
|---|---|---|
| **Version 1.0 · 02 Nov 2026** | PLANNED - not yet launched | 30% of creator fees actually received |

## Our commitment

CPRMoon will prioritize transparent development, verifiable milestones, community participation and responsible treasury management. This roadmap describes intentions, not completed features or guaranteed outcomes.

## Long-term loyalty milestones

| SILVER | GOLD | DIAMOND | LEGENDARY |
|---|---|---|---|
| **30 days** | 90 days | 180 days | 365 days |
| **1.0x points** | 1.5x points | 2.0x points | 3.0x points |

The multipliers above are proposed loyalty-weighting factors. They are not fixed yields, interest rates, or guaranteed payouts. Eligibility and actual distributions depend on the published program rules and available funds.

# Development phases

The sequence below is indicative. Each phase begins only when its dependencies are ready; no completion dates are guaranteed.

## 01 FOUNDATION & TRUST | PLANNED

Verify creator-fee eligibility and receipt mechanism; publish official token information, team-controlled wallets and program policies.

Completion evidence: Public fee-status disclosure; official links; versioned rules.

## 02 COMMUNITY EXPERIENCE | PLANNED

Improve website, educational content, wallet connection and accessible community updates.

Completion evidence: Working wallet connection; public progress page; community feedback channel.

## 03 HOLDING-TIME TRACKER | PLANNED

Build Solana transaction indexing, per-lot holding-age calculations, wallet snapshots and anti-duplication safeguards.

Completion evidence: Auditable Silver/Gold/Diamond/Legendary status in a test dashboard.

## 04 TREASURY & ACCOUNTING | PLANNED

Reconcile creator fees actually received; allocate 30% to a separately identifiable reward reserve; publish transaction references.

Completion evidence: Treasury ledger; fee receipts; reserve balances and reconciliation reports.

## 05 PILOT & INDEPENDENT CHECKS | PLANNED

Test eligibility, partial sales, transfers, duplicate claims, costs and small distributions before public activation.

Completion evidence: Published test results; security review; approved distribution rules.

## 06 PUBLIC REWARDS LAUNCH | NOT STARTED

If legal, security and funding checks pass, open eligible reward epochs and publish verified on-chain payment records.

Completion evidence: Live dashboard; transparent allocation records; community reporting.

# How rewards will work

## Funding rule

30% of creator fees actually received and reconciled will be allocated to the rewards reserve. This is not 30% of total trading volume, market capitalization, or all platform fees. If no eligible creator fees are received, no new reward allocation is created.

| USE OF RECEIVED CREATOR FEES | PROPOSED SHARE |
|---|---|
| **Long-term holder rewards reserve** | 30% |
| **Project development** | 50% |
| **Operations and contingency** | 20% |

The 50% / 20% split is a preliminary operating proposal. Any change will be published before it takes effect. Network costs and any applicable obligations will be disclosed.

## Proposed holder tiers

| TIER | HOLDING PERIOD | POINTS WEIGHT |
|---|---|---|
| **Silver** | 30+ days | 1.0x |
| **Gold** | 90+ days | 1.5x |
| **Diamond** | 180+ days | 2.0x |
| **Legendary** | 365+ days | 3.0x |

## Allocation logic

For each eligible wallet: weighted score = eligible token quantity × tier multiplier. The wallet’s share of a funded reward epoch equals its weighted score divided by the sum of all eligible weighted scores, multiplied by the net distributable pool.

## Fairness and safeguards

• Each purchase lot retains its own holding age; newer tokens do not inherit the age of older tokens.

• Partial sales reduce eligible quantities; transfers and related wallets require anti-duplication checks.

• Team-controlled wallets will be excluded from community distributions.

• Eligibility start date, snapshots, payout minimums and distribution frequency must be published before activation.

• Payments will require treasury reconciliation, administrative approval and verifiable on-chain transaction IDs.

# Public progress tracker

This table is designed to be updated in each new PDF release. A status is not “Complete” until public evidence is linked.

| MILESTONE | CURRENT STATUS | EVIDENCE / NEXT UPDATE |
|---|---|---|
| **Fee eligibility verified** | Not verified | Confirm Pump.fun creator fee settings |
| **Website and official information** | In development | Publish official project page |
| **Wallet-based loyalty dashboard** | Planned | Prototype and security tests |
| **Holding-history indexer** | Planned | Define snapshot and lot rules |
| **30% reward treasury** | Planned | Verify actual fee receipts |
| **Pilot distribution** | Planned | Test funded allocations |
| **Public reward distribution** | Not launched | After all launch gates pass |

## What the community will be able to monitor

• Milestone status: Planned / In progress / Testing / Complete / Blocked.

• Creator fees received, 30% reserve allocations, reserve balance and treasury transactions.

• Published eligibility rules, snapshot dates, eligible wallet counts and funded reward epochs.

• Payout transaction signatures, any failed transactions and resolution notes.

• Document version, publication date and a changelog of roadmap updates.

## Launch gates

Before any real payouts: confirm fee eligibility and funding; validate historical holding calculations; complete security and anti-abuse testing; publish rules and exclusions; review legal and tax considerations; then approve a small pilot.

## Important notice

This roadmap is informational and subject to revision. CPRMoon is a speculative crypto asset. Holding tokens does not guarantee income, profits, liquidity, token appreciation or any reward. The project has not represented that a live rewards system, fee balance or payout mechanism is already available. Do not share wallet seed phrases or private keys.

NEXT UPDATE: To be announced through official project channels. | VERSION: 1.0 | RELEASED: 02 NOV 2026
